- Educational podcasts
- Reading non-fiction books

#### Skills:

- HTML, CSS, Sass
- JavaScript, TypeScript
- Node.js, NPM, Express.js
- REST API, Axios
- React, React Router, React Hook Form
- MongoDB, SQL
- GIT

#### Projects:

- **Meuka** – a MERN stack-based eCommerce WebApp with secure authentication, API integration, and a sleek user interface. Solo project, currently in progress.
- **JustBucks** – a web-based finance tool built with JavaScript for tracking income, expenses, and financial health. Solo project.
- **Weather App** – a JavaScript-based weather app with MVC architecture, offering real-time forecasts, location auto-detection, and search history. It was built for responsive design and seamless data handling—a solo project.
- **Tic-Tac-Toe** is a 1v1 game written with JavaScript, player vs. player and player vs. PC modes, minimalist design, and light/dark themes. Simple, smooth, and intuitive gameplay. Solo project.

#### Additional info:

- Driving license: category B
- Desire for skills development and education
- Ability to work under time pressure.

*I am ready  
to cooperate!*
